WASTEWATER RECLAMATION AUTHORITY
WRA SOUTHERN TIER HIGH FLOW PUMP STATION IMPROVEMENT
PHASE 10, SEGMENT 14
ENERGY UTILIZATION CERTIFICATION

This letter is to provide the certification to the Iowa Finance Authority with respect to the design and construction of the WRA Southern Tier High flow Pump Station Improvements - Phase 10, Segment 14 project. The project will involve the construction of a new building enclosure and the installation of new wastewater pumps and control equipment.

The project involves the next phase of improvements to the Southern Tier Pump Station. Although the project might be classified as rehabilitation of an existing facility, it is more in the nature of new construction. For purposes of the I-Jobs program, it would appear the project would be appropriately classified as new construction.

The new facility will be designed in a manner that will comply with the current building energy code requirements.

The project will involve the installation of submersible dry pit pumps. The submersible dry pit pumps will utilize high efficiency motors. However the Energy Star program elected not to certify large electric motors.

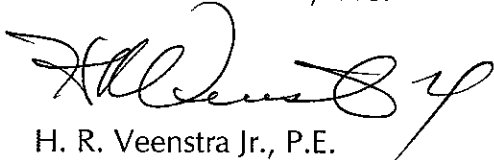

The project will involve heating and ventilating improvements, and other smaller electrical and control equipment. To the extent Energy Star equipment is available the facility will be designed to use equipment meeting the efficiency standards of the Energy Star program.

This letter is to certify the WRA Southern Tier High Flow Pump Station improvements will meet the current building energy code requirements. This letter is to certify to the extent Energy Star equipment is available for the project the project will use equipment with the Energy Star rating.
